Tivoli Identity and Access Management Offering

As your IT infrastructure transforms into a Services Oriented Architecture, you need a secure, flexible identity and access management framework that can keep pace.

Ascendant Technology, a Premier IBM Business Partner, provides a comprehensive set of packaged solutions combining IBM's Tivoli Identity and Access Management Products and expert consultants in Identity Management architecture and deployment. We offer packaged and custom solutions and services which help small to medium sized businesses reap the benefits of a solid Identity and Access Management infrastructure.

We have designed our offerings under five guiding principals:

1. Developing a solid enterprise directory infrastructure
2. Keeping identity information synchronized across the enterprise
3. Implementing a policy based framework for Access and Authorization to managed resources
4. Providing centralized role and request based provisioning to resources with compliance in mind
5. Extending the Identity Management framework through Federation

IBM Tivoli Identity Manager
- Automated reconciliation of user accounts to ensure only valid users can access systems
- Automated user provisioning
- Supports business oriented workflow processes
- Closed-loop policy management
- Self-service for account management and password reset

IBM Tivoli Identity Manager Express
- Easy to configure/deploy
- Request based provisioning
- Simple self-care password management
- Management recertification of user access

IBM Tivoli Access Manager for e-business
- Single Sign-On (SSO) to web resources
- Flexible authentication
- Centralized access control for applications
- Delegated user administration

IBM Tivoli Access Manager for Enterprise Single Sign-On
- Enterprise SSO, including client/server applications
- Windows desktop password reset
- Multi-user (kiosk) support
- Advanced authentication support

IBM Tivoli Federated Identity Manager
- Federated Single Sign-On and provisioning for applications in federated cross-domain configurations
- Secure trust management platform for Web services-based application interactions

IBM Tivoli Directory Integrator
- Synchronization and cleansing of user account data across disparate directories

DataPower Security Appliance XS40
- XML Performance/scalability
- Built-in integration for Enterprise Service Bus and SOA implementations
